

ICT enabled tools for effective teaching-learning process

In today's technological world, ensuring that students are well versed with Information and Communication technology is a must. The faculty work to integrate technology for effective teaching and learning. The college is equipped with LAN, DELNET and WiFi connectivity allowing inclusion of online resources to further classroom learning. Classrooms have smart boards which allow usage of interactive learning methods, showcasing of audio-visuals and more.

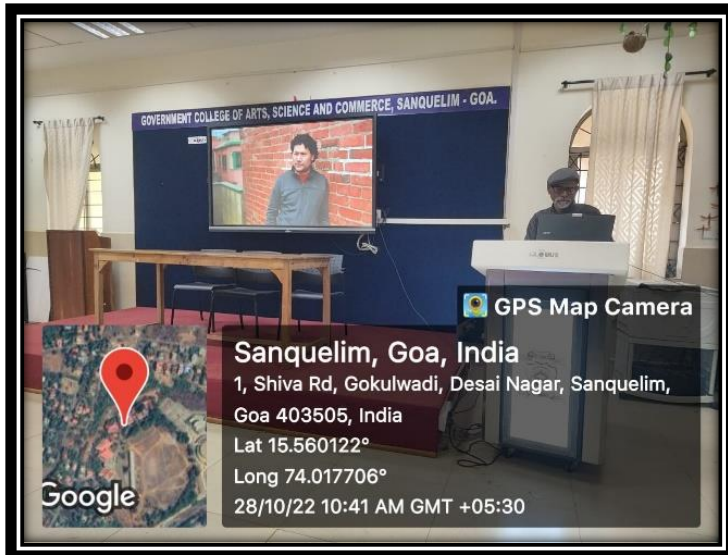

Classrooms equipped with ICT facilities.

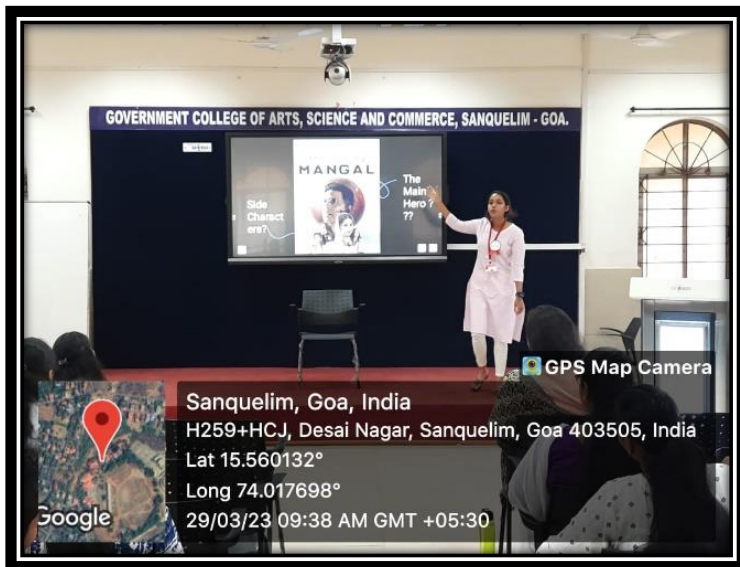

Faculty make wide use of YouTube Videos, images to provide access to additional resources, interactive online quizzes where students can gauge their performance, student-paced online revision forums to facilitate effective teaching and learning and provide additional assistance to students who work at a slower pace.

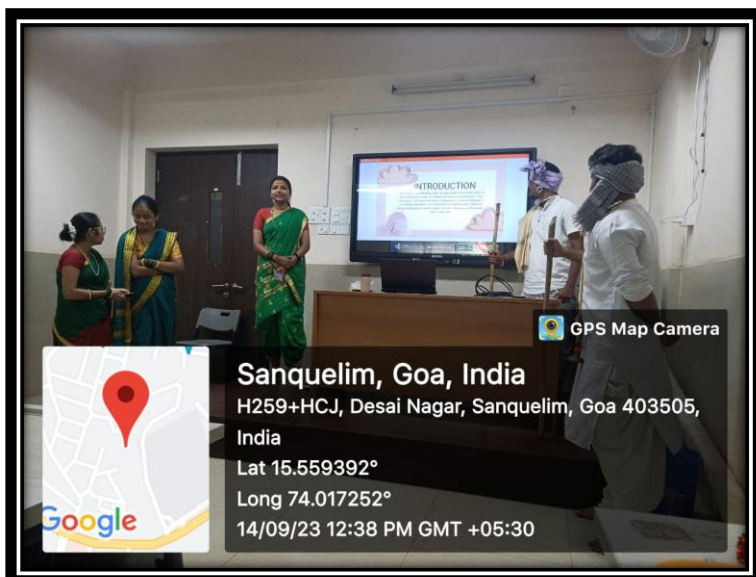

Usage of SmartArt tools to simplify comprehension

Usage of Audio-Visual Media to enhance classroom learning

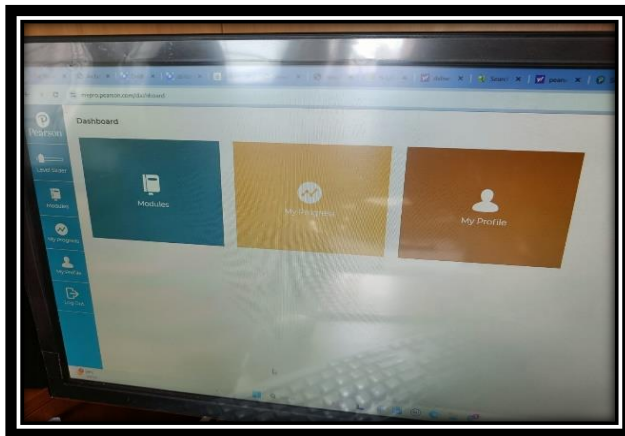

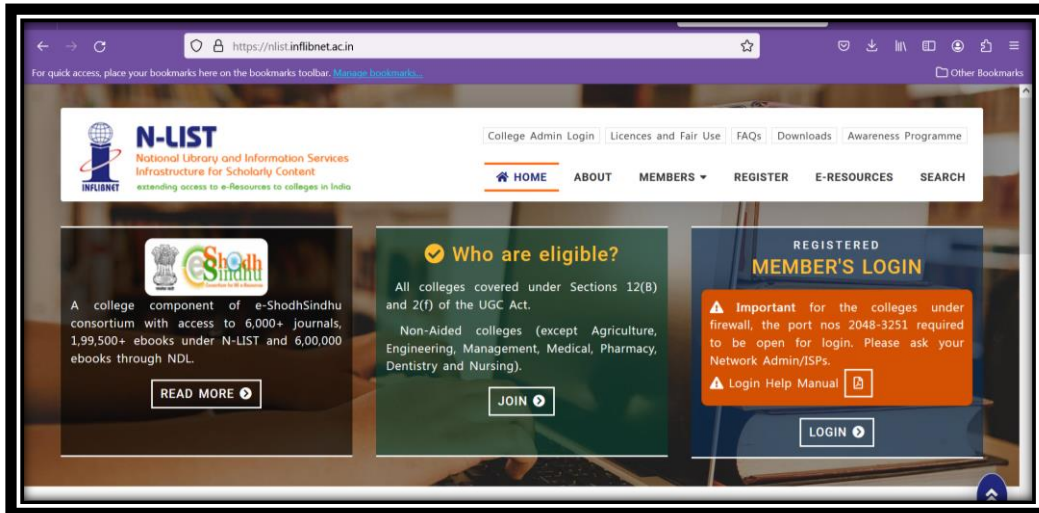

Using projection and digital whiteboard facilities to make learning interactive

Using ICT for participative & immersive learning

Students are encouraged to access DISHTAVO resources and obtain additional learning or sign up for MOOC courses to further enhance their knowledge in an associated area. Smart Boards, LCD projectors, graphic pen tablets, PPTs, PDFs, are used by teachers on a regular basis to transmit information among students. Students are encouraged to expand their knowledge by making use of digital library facilities that the college is subscribed to.

Using digital/ online library resources like Pearson, Nlist, DELNET to further learning
