

Lecture Plan		
Name of the College: Government College of Arts, Science and Commerce, Sanquelim - Goa		
Name of Faculty: Ms. Hema Umesh Sawant	Subject: Geography	
Paper code & Title: GEC 109 & Regional Planning in India	Program: T.Y.B.A.	Division: NIL
Academic year: 2024-25	Semester: VI	Total Lectures: 51
Course Objectives:		
To understand and evaluate the concept of region and regional planning with reference to India. To identify the issues relating to the development of the regions in India through the process of spatial organization of various attributes and their interrelationship.		
Course Outcome: This course provides a comprehensive overview of regional planning in India, examining its historical evolution, contemporary challenges, and future directions. It will delve into the theoretical foundations of regional planning, explore the diverse planning approaches adopted in India, and analyze the role of various actors and stakeholders in the planning process.		
Student Learning Outcome: · Understand the fundamental principles of regional planning: Students will be able to articulate the rationale behind regional planning in India, including its significance in addressing regional disparities and promoting balanced development.		
· Analyze the context and strategies of regional planning: Students will be able to identify and analyze the key factors influencing regional planning in India, such as agro-ecological zones, multi-level planning, and resource regionalization.		
· Delineate planning regions in India: Students will be able to differentiate between various types of planning regions in India, including industrial regions, growth centers, and metropolitan areas, and understand their respective planning needs.		
· Assess the role of manpower planning in regional development: Students will be able to evaluate the importance of manpower planning in India and identify key objectives and priorities for effective human resource development within the context of regional planning.		
· Understand the characteristics and challenges of urban regions: Students will be able to define and classify urban regions in India, including census definitions, hierarchy of urban systems, and changing connotations of urban areas.		
· Analyze rural and urban planning issues: Students will be able to examine the challenges faced by rural areas and urban fringes, and evaluate the effectiveness of various		

development programs and planning strategies.

- **Evaluate the evolution of planning mechanisms in India:** Students will be able to assess the features, achievements, and failures of five-year plans and understand the role of NITI Aayog in the changing planning mechanism of India.
- **Apply planning principles to specific regional contexts:** Students will be able to analyze planning challenges and opportunities in specific regions of India, such as Goa, considering factors like tribal areas, coastal regions, and natural disasters.
- **Develop critical thinking and problem-solving skills:** Students will be able to analyze complex regional planning issues, identify potential solutions, and evaluate the effectiveness of different planning approaches.
